Continuation of 11. does NOT place the application in condition for allowance because: The added limitations in claims 1, 7, 15, 16, and 18 of altering image data would require further consideration and/or search.

The applicant argues on pages 8 and 9 of the response in essense that:

Alterating the size of the image data after the image data transmission method is selected based on size would destroy the operating principle of Misawa et al.

Misawa et al. disclose selecting facsimile or email transmission, according to a size of the image data (col. 8, lines 10-21). Kim discloses adding white pixels to an image to be sent by facsimile. This combination does not destroy the reference of Misawa et al. because the size determining the method of transmission is not the same as the predetermined size the image data is altered to be.
